

TITLE: Organization Structure of a Basic School of Arts

AUTHOR: Iveta Sinkulová

ABSTRACT:

My bachelor thesis “Organization Structure of a Basic School of Arts“ sets a goal to research which organization structures are applied at basic schools of arts, how the jobs of headmaster and heads of departments are incorporated into the Org Chart and which tasks are delegated to them in terms of the management of teaching process.

The first thing performed was descriptive research. Then the work of deputy headmaster and heads of departments is analysed and areas for delegation of tasks and corresponding jobs are suggested.

Based on research of Org Charts of some other schools of arts, this work could be a clue how to set up and work on the structure or how to deal with its possible changes.

My research and conclusions will well serve to the headmasters of basic schools of art, who care about how to control the teaching process and better organize the jobs. The output should provide a holistic view on the subjects. Org Charts should be a live document and not just a formal thing.
